Professional Summary

Front-end focused Full-Stack Developer with 10+ years of experience building responsive, scalable web applications using React, JavaScript, and modern web technologies. Proven ability to translate complex business requirements into intuitive, high-performing user interfaces that support real-world operations. Experienced working in enterprise environments, collaborating with cross-functional teams, and improving system performance through thoughtful design and efficient data handling.

Web Developer – Racami (2020–Present)

Design and develop user-facing applications that support complex workflows and high-volume data interactions. Work closely with product teams, engineers, and stakeholders to transform requirements into responsive, intuitive interfaces. Improved system performance by restructuring how data is retrieved and processed, increasing efficiency by approximately 50%. Regularly enhance features, resolve issues, and refactor components to improve maintainability and usability.

Solutions / Services Engineer – Racami (2014–Present)

Act as a technical partner between clients, support teams, and development, ensuring that software solutions are reliable and aligned with business needs. Diagnose and resolve system issues, improve performance, and maintain consistent data flow across integrated systems. Support both technical and non-technical users through clear communication and effective problem-solving.

Production Assistant – Transproma (2012–Present)

Supported development and delivery of software and production systems by working with backend teams and QA processes. Helped identify and resolve recurring system issues, improving efficiency and product quality across multiple client implementations.

Projects

Dynasty: Built a React-based application focused on performance, responsive design, and scalable architecture.

Labs Admin Dashboard: Developed an enterprise-style React dashboard with role-based access and API integrations across multiple services.

Weather Application: Created an Angular application that integrates real-time API data with a dynamic, user-focused interface.

Technical Skills

JavaScript, React, Angular, HTML, CSS, Node.js, SQL, MongoDB, REST APIs, C#, .NET, Bootstrap, jQuery, Agile Methodologies

Education

B.S. Physics – Morehouse College, Atlanta, GA

Full Stack Development Certificate – Georgia Tech
